

1- Write a script that asks the user to enter two numbers, obtains the two numbers from the user and outputs text that displays the sum, product, difference and division of the two numbers.

1- Use the techniques shown in Fig below

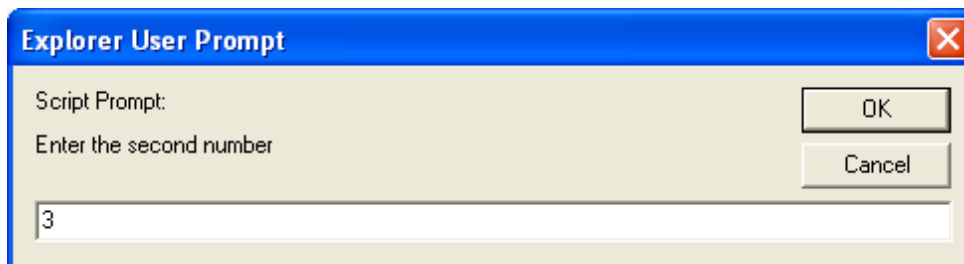

Explorer User Prompt

Script Prompt:
Enter the first number

12

OK Cancel

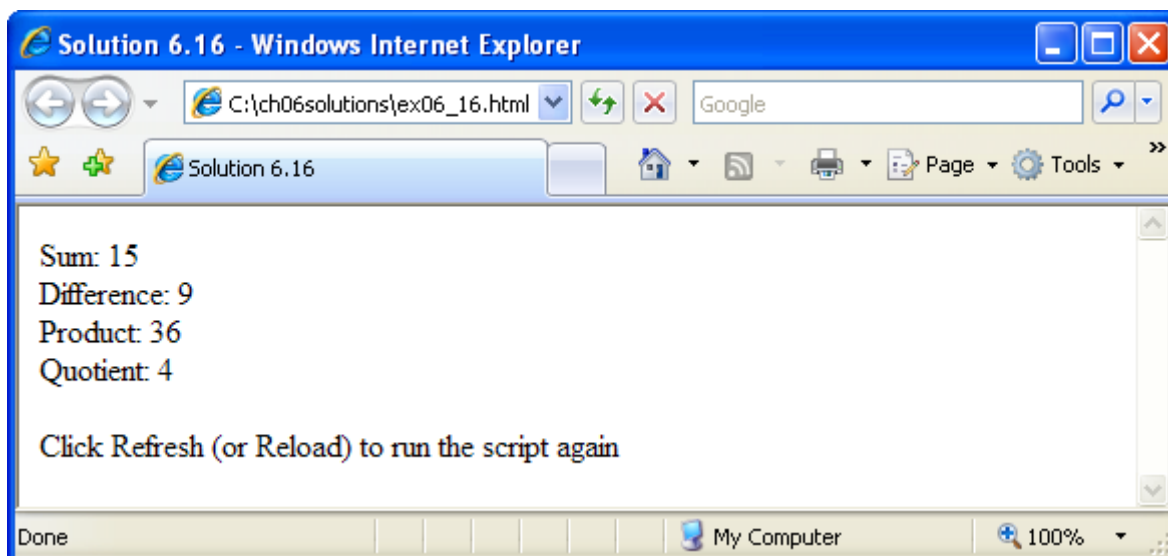

Explorer User Prompt

Script Prompt:
Enter the second number

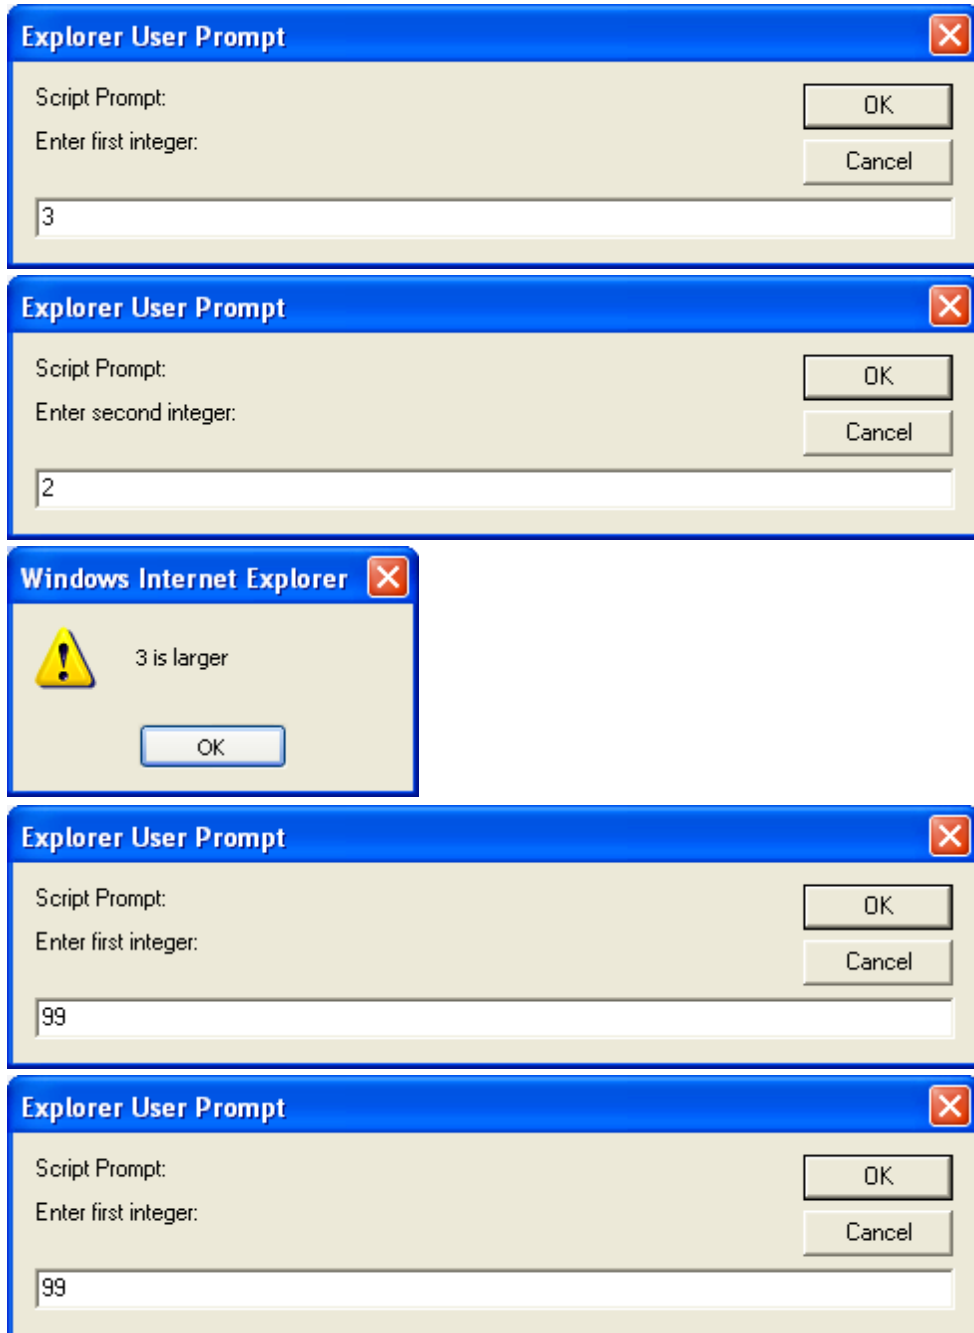

3

OK Cancel

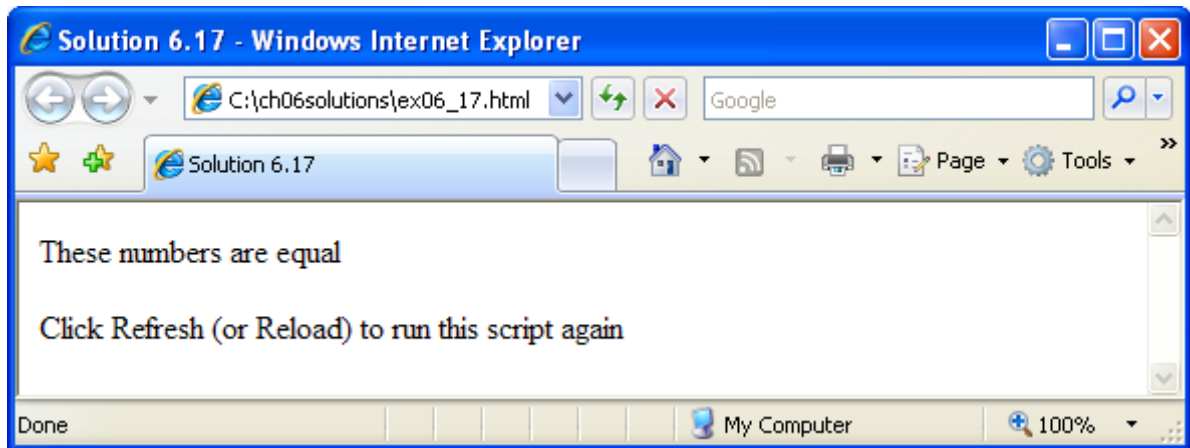

2- Write a script that asks the user to enter two integers, obtains the numbers from the user and outputs text that displays the larger number followed by the words "is larger" in an alert

dialog. If the numbers are equal, output HTML text that displays the message “These numbers are equal.” Use the techniques shown in Fig

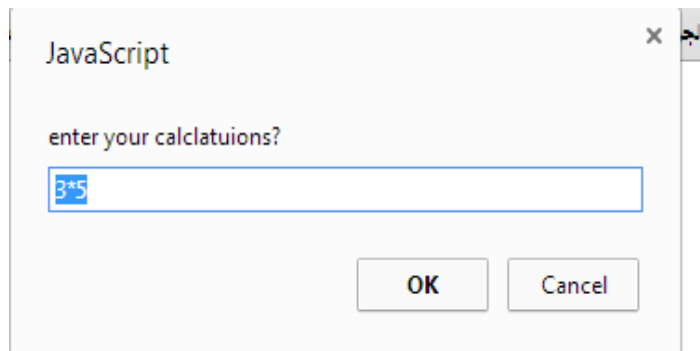

Assignment_Day_01 (intake 40)

- 3- Write a script that simulates the calculator, by taking a complete mathematical operation from the user in a prompt box, and display the final result.

Notes:

- 1- Use prompt message to enter the calculation
- 2- Use a function to calculate mathematical operations
- 3- Display the output using alert function
- 4- Input & output should be the following :
